

New Services NOT in Platted Subdivisions

Service Requirements Policy

- All new services are charged a non-refundable connection fee of \$700 per service entry.
 - A service entry is defined as a run of cable(s) to a structure.
 - Structures having a bank of meters in one location is one entry.
- All temporary services are charged a non-refundable connection fee of \$100 per temporary board where the service is intended to become permanent service
 - Construction trailers, etc. will be analyzed on a case-by-case basis.
- All meter bases on structures shall be installed on the side of the structure closest to the power source.
- In special circumstances such as frost, snow, mud, flagging requirements, etc., fees will be charged if we are asked to continue with work in these conditions.
- Locations on the general service rate will be given a credit of either \$4,000 (residences and businesses) or \$1,000 (barns, pumps, etc.). All other estimated costs shall be paid before the commencement of work as a Cost-in-Aid to Construction (CIAC). Based on the usage of the service over a 24-month period, the service may be eligible for a refund of a portion or all of the CIAC.
- Locations on small and large power rates will be given a credit of an estimated 24-month revenue calculation. All other estimated costs shall be paid before the commencement of work as a CIAC. Based on the actual usage of the service over a 24-month period, the service may be eligible for a refund of a portion or all of the CIAC.
- Easements for the property where the service is to be installed must be signed before construction begins.
